## **EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE**

### ***Response to Amendment***

1. Applicant's amendment filed on October 26, 2005 has been fully considered and entered.

### ***Reasons for Allowance***

2. Claims 15-25 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to disclose or reasonably suggest all the limitations recited in independent claim 1. Specifically, the prior art of record fails to disclose a dispersion-shifted fiber having a zero dispersion wavelength that is longer than 1640 nm and a polarization mode dispersion of not more than  $0.1 \text{ ps}/(\text{km})^{1/2}$  at a wavelength of 1550 nm in combination with the other limitations of claim 15.

Claims 16-25 depend from claim 15.

The examiner agrees with applicant's arguments on pages 7-9 in the remarks and fully concurs that Shimatakahara et al. do not disclose or suggest a dispersion-shifted fiber with all limitations as defined above.

The newly cited reference, Kato (U.S. Patent 6,556,758) discloses an optical fiber for an optical transmission line comprising a dispersion of  $-1.0$  ps/nm/km to  $-10.0$  ps/nm/km in a wavelength range between 1530 nm to 1620 nm and a dispersion slope of  $0.04$  ps/nm<sup>2</sup>/km in a wavelength range between 1530 nm to 1620 nm. However, Kato does not disclose a dispersion-shifted fiber with all limitations as defined above.

Claims 15-25 are therefore allowed.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
